

Practical Security, Inc.

Fact Sheet

Company

Information Practical Security, Inc. (PSI) is an information security services company dedicated to helping organizations of all sizes secure their mission critical information technology assets. Practical Security provides a practical and educational advantage to companies seeking ways to safeguard their information assets by helping employees at all levels be better prepared to detect, analyze and prevent IT security breaches.

Services PSI offers core IT security and executive consulting services, which are broken down into four areas of practice:

1. **Security Assessment** which includes vulnerability assessment, security audit, penetration testing and data forensics;
2. **Security Management** which includes certification and accreditation, requirement analysis, product selection, system integration, and subscription services;
3. **Security Training** which includes product training, security awareness training and software development implications;
4. **Executive Services** which includes technology market analysis, technical due diligence, and development of industry white papers.

Paul E. Proctor, Founder

Founder and chief technology officer of Practical Security, Inc., Paul E. Proctor, has over 15 years experience in computer security. Previously, Paul was founder and CTO at Centrax Corporation and senior vice president of NFR Security. He developed the Computer Misuse Detection System (CMDs), one of the first commercially available host-based intrusion detection systems while at SAIC, and was director of technology at Cybersafe Corporation before joining NFR Security.

Paul E. Proctor is the author of two recent books, ***The Practical Intrusion Detection Handbook***, and ***The Secured Enterprise: Protecting Your Information Assets*** (co-authored with F. Christian Byrnes). Paul holds a Bachelor of Science degree in mathematics and computer science from the University of Illinois.
